Three large foundation ditches had already been excavated. On 22 May, a railroad track from Vogelsang railroad station toward Camp Cannenburg. The construction of this track had started about 4 weeks ago and was completed except for a stretch about 2,000 meters from the camp.
3.	No military shipments arrived at or left the Templin railroad station from 16 to 22 May 1953. Pit props which arrived from the direction of the firing range were the only items loaded during the period of observation.
25X1 25X1	From 11 to 22 May 1953, Soviet soldiers were employed to deforest the wieds in the Beutel-Tangersdorf area
5. 25X1	Signboards indicating that the area was off limits were along the Vcgelsang-Hammelspring road. Sentries and motor patrols were employed in the area immediately along the road.
25X1 6. 25X1 25X1 25X1	On 15 May 1953, soldiers received training on 152-mm gun howitzers, immediately along the road about 1 km south of Hammelspring. Trucks  and three half-track vehicles were nearby. On 18 May, a morter unit and two rocket launchers of 132-mm caliber practiced in the area of the large Lanke See (lake).
25X1 7.	ı
25X1 25X1	On 22 May 1953, the barracks installations northwest of Vogelsang were not occupied. Brick layers were still working on two barracks building white the kitchen was completed. Truck was loaded in front of the kitchen and subsequently drove toward Camp Burgwell on 20 May.
25X1 <sup>9</sup> • 25X1 25X1	From 18 to 25 May, the construction of the new barracks installation morthwest of Vogelsang made only little progress. As the transformer station in Hammelspring was damaged by a lightning stroke, the pumps and concrete mixer; were without supply of current. Sedan parked at the site on 20 May: 2
10.	An undetermined number of T-34 tanks was at the Templin railroad station on 23 May 1953. Motor vehicles were observed at Camp Hammelspring.

25X1	1.	Comment. The information indicates that the Templin troop training grounds was still occupied by the 6th Gds Mecz Div, the 25th Tank Div End headquarters units of the Fourth Gds Mecz Army including an unidentified AT artillery brigade and units of the 63d AAA Div (US) until late May 1955. These units have, however, no gun howitzers. The information contained in
25X1		paragraph 1 indicates that the column of 12 x 120-mm nortars belongs to the 25th Tank Div and thus rather safely to the unidentified mortar regiment of the division which is thus confirmed until 29 May 1953.
		The fire restriction until 30 May was probably due to the deforestation at the troop training grounds which was possibly made for a new training pressor the construction of new installations. The tent carp on Stuebnitz See (lake) near Tangersdorf is on the north boundary of the training grounds. The location of Jagen (forest section) No 101 cannot definitely be stated. The das-
		cription by source of paragraph 2 indicates that this forest section is in the area of Camp Kannenburg where it is, however, not entered in the 1:25,000 map. There is the possibility that new barracks buildings will be built in
		this forest section. No previous information is available to indicate a track between the Vogelsang railroad station and Camp Kannenburg.
25X1 25X1 25X1	2.	Comment. The barracks installations in Vogelsang were previously reported to have been vacated by troops in mid-May to make possible a smooth execution of the construction work.
